2. SNI-1 is an optional accessory for Chronos.  
3. This product is in conformity with Regulation EU 2017/745 on medical devices (MDR).

# SightPilot NAVi™

## Balancing Innovation with Tradition for an Enhanced Refraction Workflow

SightPilot NAVi™, equipped with multi-language voice guidance, allows patients to easily follow instructions and proceed through a refraction. By combining voice guidance with a simple controller, patients can select their preferred options each time and perform both objective and subjective tests. This helps streamline refraction workflow in your clinic.
